MICRONEEDLING WITH PRF

Microneedling with PRF enhances facial skin rejuvenation. Microneedling relies on the principle of neovascularization (new blood flow) that occurs as a result of minimal trauma causing rapid new collagen formation of the skin surface. This is performed in an automated fashion with a Dermapen; a powered medical device that delivers a vibrating stamp-like motion to the skin resulting in a series of micro-channels.

FACIAL INJECTIONS WITH PRF

Using your own body's natural and powerful healing proteins and concentrated growth factors found within blood, we use PRF to rejuvenate skin, treat hair loss, increase collagen production, remove wrinkles, reduce acne scarring, and tighten skin.

TREATMENT \$600

BIO-FILLER MADE WITH PRF

Following 2 years of extensive research, the Bio-Filler[®] technology was launched as a 100% all natural way to use PRF as a natural biological filler (Bio-Filler[®]). During its processing, PRF is heat-treated to drastically extend its working properties making it readily available as a 100% all natural injection material without needing foreign body materials or chemicals. Typically, the Bio-Filler lasts for roughly 6 months but it also facilitates regeneration of

SMOOTHLASE (FOTONA)

SmoothLase[™] is one of the signature treatments of the Fotona Laser system featuring the ability to regrow and stimulate collagen from the inside of the mouth. These procedures have entirely no downtime and patients can return to work immediately thereafter. Remove and regenerate deep nasolabial folds caused by aging and Marionette lines effectively using the SmoothLase protocol.

TREATMENT \$700

SMOOTHEYE (FOTONA)

Fotona SmoothEye[™] offers peri-Ocular resurfacing 'Smooth Eye', this is a particularly popular treatment among those with age concerns. A laser light is used to regenerate the surface of the skin, softening the appearance of wrinkles, tightening the skin and lifting drooped contours. This treatment can be used as a stand-alone treatment or used after having had anti-wrinkle injections to prolong results. No injections needed!

LIPLASE (FOTONA)

LipLase™ enhances lips to give a fuller, more natural appearance through the use of laser energy. This is done through the process of collagen regeneration. This is a non-surgical, non-invasive treatment that is done from inside the mouth as well as the outer lip area. There are no injections needed, no foreign materials are used, and the patient can return to day to day activities immediately with little or no side effects. LipLase rejuvenates, fills, and plumps lips as well as defines shape.

TREATMENT \$200

LASER PEEL (FOTONA)

Use the procedure most commonly desired by celebrities and actors to improve collagen regeneration of the skin. This procedure is fast, effective and entirely painless.

TREATMENT \$450

MOLE REMOVAL (FOTONA)

Mole removal is an easy and fast procedure that can be performed within 5 minutes utilizing the advanced Fotona laser system. By removing tissues layer by layer, the mole can be removed entirely in a painless procedure.

TREATMENT \$200

VEIN REMOVAL

Laser treatments are now a routine procedure for the removal of many types of vascular concerns of the face and body. The perfect vascular solution is long-pulse Nd:YAG laser beams (Fotona) which are highly attracted to the haemoglobin present in the blood vessels. This allows the immediate disappearing of visible facial veins in less than 15 minutes. Procedure is entirely painless.
